

Announcement regarding the adoption of the Decision of the National Energy Regulatory Authority (ANRE) no 1397/26.09.2017 on the approval of the amendments to the binding open season documentation for the RO-HU interconnection point

By Decision no 1397/26.09.2017 ANRE approved the amendment of the binding Open Season Rulebook for the Open Season to be jointly performed by Transgaz S.A. and FGSZ ZRT for the allocation of incremental capacity at the interconnection point between the Romanian and the Hungarian gas transmission systems.

The amendment refers to the binding Open Season performance schedule agreed between the two transmission systems operators subsequent to the public consultation held during 24 August – 8 September.

The Decision no 1397/26.09.2017 as well as the final version of the Binding Open Season Rulebook and its annexes are available on the company's webpage in the section [Client Information/Capacity booking in the interconnection points/RO-HU Open Season](#).

We would like to underline that the Rulebook approved by ANRE contains the aspects of the binding Open Season relevant for the Romanian party.
