Press release on the launch of the TransGasDigital project POCU/861/3/12/142625

SNTGN Transgaz SA, as the beneficiary, is implementing the **TransGasDigital project**, starting on 28 July 2021, for 18 months.

The project's overall objective is to improve the level of digital knowledge and skills of the company's employees through participation in specialised training courses, where they will acquire basic and advanced IT skills. The overall objective of the project, set in line with the POCU objective AP 3/PI 10iii/OS 3.12 "Improving the level of knowledge/skills/abilities related to the economic sectors/areas identified according to the NSC and NSRDI of the employees", is to support the development of the company's employees who will be able to perform their job tasks more efficiently by using the digital applications specific to their work. The project will provide specialised training for 180 participants, representing a target group of 132 company employees, some of whom will benefit from more than one type of course within the project. The knowledge acquired as a result of the training courses will generate positive long-term effects: both for the employees who will improve their digital skills (basic or advanced) and for the company by increasing Transgaz' competitiveness and flexibility. The improvement of digital skills facilitates innovation and creates the conditions and the appropriate framework for technological progress, an important vector in adapting Transgaz' capacity to the dynamics of the energy sector, a sector with competitive potential according to the National Strategy for Competitiveness.

The total eligible amount of the project is Lei 2,294,922.54, of which the grant is Lei 1,147,461.25.

The project's implementation started on 28.07.2021 and will end on 27.12.2022.

The project is co-financed from the European Social Fund (ESF) under the Human Capital Operational Programme 2014 - 2020 (POCU).
