

The methodology for capacity allocation and tariff setting at points situated on the transmission pipelines Isaccea 2, Isaccea 3 – Negru Voda 2, Negru Voda 3 (Transit II+III) is regulated by [ANRE Order no. 34/2016](#), supplemented by [ANRE Order no. 158/2019](#) .

Booking capacity on the points related to these pipelines is possible after the conclusion of *Interconnection Agreements* with adjacent transmission system operators, currently under analysis and negotiation.

SNTGN Transgaz SA will communicate through an *Announcement* the capacity auctions offering capacity products, bid level and conditions for participation in auctions in the [Public Interest - Announcements](#) section.

After the conclusion of the *Interconnection Agreements*, the commercial rules agreed by adjacent transmission systems operators for interconnection points related to the two pipelines, will be published in the section: [Customers-Transmission Services -Interconnection procedures](#).
