

03.08.2023

Dear Partners,

We take this opportunity to inform you that Transgaz launches a non-binding market demand assessment process for the hydrogen transmission capacity related to the future interconnection points (IPs) and the future Romanian points of production and points of exit to the consumers of hydrogen.

We encourage all potential hydrogen producers, consumers and shippers to submit their demand indicating the production, consumption, import, export as well as the cross-border hydrogen transmission demand via Romania.

The submitted demand could lay the foundations and shape the possible hydrogen infrastructure developments, the draft plans having been prepared so far can be referred to at the following web pages: www.ehb.eu, www.h2inframap.eu.

Your non-binding demand indications can be delivered by filling out the **survey form** available [at this link](#) and submitted to our company.

As regards the interconnection points, please note that your non-binding demand will only be considered if you submit the demand to both concerned Transmission System Operators (TSOs). If the demand is not submitted by the same legal entity on both sides of an interconnection point, but by a shipper pair, the name of the shipper pair and its submitted demand has to be notified to Transgaz too, using the Excel form.

Within 6 weeks from the end of the demand submission period, but not later than 1 November 2023, Transgaz will publish the results within the **Market Demand Assessment Reports**, in case of interconnection points, by mutual agreement with the neighbouring TSOs.

The **Survey Forms** filled in with **non-binding demand indications shall be submitted to** the email address demand.assessment@transgaz.ro by **15 September 2023**.

Should you have any queries regarding the above-mentioned procedure, please feel free to contact us at the same e-mail address.

Yours sincerely,

SNTGN Transgaz SA
