

Transmission tariffs for interruptible standard capacity products

1. Transmission tariffs for daily interruptible capacity products, for IP Csanádpalota, on flow direction Ungaria-România, are determined by applying of an ex-ante discount of 12,59% on flow direction Ungaria-România and 57,55% on flow direction Romania-Ungaria, to the transmission tariffs for daily capacity booking products.
2. Transmission tariffs for capacity booking products, other than those mentioned on point 1, are identical to the transmission tariffs for the firm services published in this Section. For these interruptible services the ex-post discount is applied as follows: the ex-post compensation paid for each day of interruption shall be equal to three times the reserve price for the firm daily standard capacity products.
