

Dear Mr. Kovacs,

We revert to the e-mail dated 31 January 2013 related to on the planned maintenance works for 2013 with the following details:

- TRANSGAZ finalized the schedule for the maintenance works to be performed in April, precisely during 11-12 April 2013, from 8.00 a.m.-3.30 p.m.;
- 19 valves will be inspected on the pipeline section where the booked capacity might be impacted. During the inspection works, the valves will be shut off 70% for 5 minutes and then they will be fully opened. When they are blocked in the shut off position, the inspection technological schedule shall provide for corrective actions to remedy the blocking effects as soon as possible;

**If the maintenance works will be performed under normal conditions, the gas transmission capacity will be unaffected.**

Yours sincerely,

**Vasile FLOREA**

**Director  
Operating Division**
