

Non-binding market demand survey on incremental capacity

06.04.2017

Dear Network Users,

Considering art. 26 of the [COMMISSION REGULATION \(EU\) 2017/459 of 16 March 2017 establishing a network code on capacity allocation mechanisms in gas transmission systems and repealing Regulation \(EU\) No 984/2013](#), SNTGN Transgaz SA launches a non-binding market demand assessment process for incremental capacity for interconnection points as of 06.04.2017.

We mention that ENTSG has already informed the network users about the incremental process in two press releases on [24 November 2016](#) and [3 March 2017](#), as well as during the implementation workshop of the CAM-NC amendment on [28 March 2017](#).

Not later than 8 weeks after the entry into force of the above mentioned regulation, Network Users are invited to submit their non-binding market demand for incremental capacity by filling in the survey available [here](#).

The general conditions for incremental capacity indications are included in the [template for non-binding demand indications by network users for incremental capacity](#) published by ENTSG (filling out of the above mentioned survey is sufficient).

The filled out survey and your questions, if any, will be sent to demand.assessment@transgaz.ro by 01.06.2017.

Within 16 weeks after the entry into force of the above mentioned Regulation, but not later than 27.07.2017 SNTGN Transgaz SA in agreement with adjacent TSOs will publish the results in demand assessment report.

Yours sincerely,

SNTGN Transgaz SA
