A Quick Overview of the CAM NC

What it is all about?

- Standardisation of transmission capacity allocation within the EU
 - Standardised capacity products
 - In terms of duration: Y, Q, M, D, WD
 - In terms of units: 25°C/0°C kWh (GCV)
 - In terms of quality (?): firm, interruptible
 - Standardised capacity allocation mechanisms (auctions)
 - Ascending clock algorithm (Y, Q, M)
 - Uniform price algorithm (D, WD)
 - Standard data exchange methods and protocols
- Moving gas trade from the borders to the virtual trading points
 - Bundled capacities
 - Product or Process bundling?
 - Single-sided nominations
 - Electronic capacity contracts

A Brief Timeline of the Pilot Project

28.10.2014	Network User Information Days (Siófok)
30.10.2014	Network User Information Days (Medias)
4-5.11.2014	RBP Training for Network Users (Siófok)
4.11.2014	Publication of the Operational Rules and the Network User Membership Agreement for the RBP (TSO websites)
11-12.11.2014	RBP Training for Network Users (Medias)
11.11.2014	Publication of the RBP Portal & Start of the Network User Registration for RBP (with personal assistance in Medias)
18.11-2.12.2014	Scheduled Network User test sessions (online)
10.12.2014	First capacity auctions on RBP

FGSZ-Transgaz MoU
on Cooperation

We are here

Official CAM NC
implementation deadline

RBP ready for the
